a hottest 30-day mean
mean absolute error (°C)
longest consecutive gap (days)
1–7
8–14
15–30
31–60
61–90
91–180
181+
b annual mean
peak observed (share = 0)
peak partly hidden (0 < share < 1)
peak fully hidden (share = 1)
c the same gap, opposite consequences
hottest 7-day
hottest 30-day
seasonal amplitude
annual mean
coldest 30-day
d designed gaps are not real gaps
designed outages (n=13,017)
real calendars (n=418)
share of cases (%)
share of the climatological peak window hidden
