Drop every incomplete year
Keep if ≥90% of warm season
Keep all, plug-in value
Keep all, D2* multiple imputation
a
Trend RMSE vs complete record (°C per decade)
10^{-1}
10^{-2}
Random
Trend
Trend + state
Trend + state ×2
How years become incomplete
b
Fitted state-dependent scenario
Station trend RMSE ratio
10^{0}
10^{-1}
Keeping years (B / A1)
Estimator (C / B)
c
Trend RMSE (°C per decade)
10^{-1}
10^{-2}
1-3
4-6
7-9
≥10
Years made incomplete in the record
d
Baden-Württemberg, same 19 stations
Regional H30 anomaly (°C) station and year effects
2003: 0 of 17 stations complete
All years (D2* for incomplete years)
Complete years only
